

Mosquito Trap - A Cheap Way

Forwarded by a doctor. It might be useful.

CAUTION:

This information may cause massive loss of jobs in insecticides companies, but it could save thousands of innocent lives from the cruel fate of dengue.

My apologies to all branded insecticides in the marketplace.

DIY is so easy and its costs are unbelievably negligible. Eradicate Aedes and dengue.

FIGHTING DENGUE MUST START AT EVERY HOME.

Mosquito trap (Dengue prevention)

It's just a mix of **water**, **brown sugar** and **yeast**.

1. Cut a plastic bottle in half, keep both parts. Can be soft drink bottle.
2. Take the lower portion of the bottle. Dissolve the brown sugar in hot water. Let it cool down to ~70 deg F (room temperature).
3. Add the yeast. **Carbon dioxide** will form. **(This will attract the mosquitoes.)**
4. Cover the bottle with a dark wrap and insert in the top portion upside down like a funnel. Place it in a corner in your house.
5. In 2 weeks you will be surprised by the number of mosquitoes killed.

捕蚊罐製作方式

材料

2000ml保特瓶、50g砂糖、1g醃粉、溫度計、量杯、刀片、黑色紙

Step1

沿著保特瓶身最突出處，先以奇異筆做記號，再以美工刀環狀切開。

Step2

倒入200ml的熱水，加入50g砂糖攪拌溶化。再將砂糖水放入冷水盆中冷卻，直到溫度降至40度以下。

Step3

冷卻後將砂糖水放入保特瓶的底座，再平均灑入醃粉，不用攪拌，待酵母發酵會產生二氧化碳。

Step4

把瓶口以相反方向塞入瓶座，邊緣處需完全密合，讓二氧化碳從瓶口慢慢散出氣體。

Step5

瓶子外圍包黑紙，蚊子喜歡黑暗處，加上瓶內會產生二氧化碳吸引蚊子進入，捕蚊罐即開始產生效用。

擺放位置

蚊子幾乎皆沿著牆邊飛行，所以放在黑暗的牆角中是效果最好的。

TIPS

此捕蚊罐放在陰暗潮溼處約2個星期後可看到顯著的效果，且每兩星期需再重新更換一次瓶內溶液。
